25th Rhinocamp Meeting Proceedings

25-29 May, 2022 Bodrum • TURKEY

PREFACE

Dear colleagues,

Medical meetings are the venue of interaction, socialization as well as education and discussions. Rhinocamp, which has been running for more than 20 years, is a prime example of a meeting where both scientific content and social and family interaction are important.

The Continuous Education and Scientific Research Education Association aims to create opportunities for ENT specialists and residents as well as other specialties.

Free paper presentations are very important in our scientific community life. Most senior speakers began their careers with free papers, which contributed to their ability to speak confidently in public. For this reason, we have devoted three half days to free papers at 25th Rhinocamp so that many young doctors and scientists have the opportunity to present their work.

The Rhinocamp organizers would like to congratulate all those who spoke at the meeting, especially the prize winners and colleagues from a far who devoted their time and energy to this meeting.

We look forward to the future Rhinocamps.

Cemal Cingi MD

President,

The Continuous Education and Scientific Research Education Association

25th Rhinocamp Meeting Proceedings

25-29 May, 2022 Bodrum • TURKEY **SCIENTIFIC PROGRAM**

25th May 2022 • WEDNESDAY			
16:20-18:00	Free Papers 1 Moderator: Nihat Susaman		
16:20-16:27	Can Increased Systemic Immune Inflammatory Index Differentiate Malign-Benign Laryngeal Neoplasms? Mehmet Akif Eryılmaz, Mitat Arıcıgil		
16:27-16:34	Assesment of Efficacy of Autologous Pure Platelet Rich Plasma Injection for Facial Rejuvenation Abdulhalim Aysel		
16:34-16:41	Complications of Filling Materials Used in Revision Rhinoplasty and a Case Report <u>Ali Seyed Resuli</u>		
16:41-16:48	Middle Vault Reconstruction with Dorsal Septal T Flap to Obtain Ideal Dorsal Aesthetic Lines <u>Fatih Ceran</u>		
16:48-16:55	The Epworth Sleepiness Scale in Obstructive Sleep Apnea by Gender Ayşe Karaoğullarından		
16:55-17:02	Histopathological Analysis of Tongue Lesions And Distribution By Age Groups <u>Mustafa Altıntaş</u>		
17:02-17:09	Mucocele Causing Ptosis Şifa Beyazpolat , Zeki Cengiz , Nazım Bozan , Mahfuz Turan , Yaser Said Çetin		
17:09-17:16	Evaluation of the Effect of Oral Oxybutynin Treatment on Nasal Mucosa in Rats Hüseyin Günizi		
17:16-17:23	Is Systemic Immune-Inflammation Index Associated with the Prognosis and Severity of Bell's Palsy? Ahmet Kara, Mahmut Emre Gundogan, Bilgehan Celik, Mahmut Sinan Yilmaz, Mehmet Guven, Halil Elden		
17:23-17:30	Comparative Analysis of Monocyte/HDL Values in Chronic Sinusitis Patients <u>Bengi Arslan</u>		
17:30-17:37	Prevalence of Audiovestibular Disfunction in COVID 19 Patients Akif Küçükcan, Nagehan Erdoğmuş Küçükcan		
17:37-17:44	Approach to Peripheral and Central Vertigo Filiz Demirdöğen		
17:44-17:50	Traumatic Tympanic Membrane Perforations Saffet Kılıçasları, Ahmet Köder		
17:50-18:00	Our External Auditory Canal Culture Results: Analysis of 298 Patients Songül Demi, Bilal Sizer		

	26 th May 2022 • THURSDAY	
08:30-08:40	Opening Speeches Moderator: Nuray Bayar Muluk	
	Welcome Addresses: Meeting Co-chairs	Cemal Cingi, Halis Ünlü
	President of Turkish ENT Society	Tayfun Kirazlı
8:40-10:00	Session 1 Moderator: Cemal Cingi	
08:40-09:00	Innovations in Medicine and ORL in Ancient Egypt	Hesham Negm
9:00-09:15	Nasal Tip Sutures	Anıl Hiişmi
9:15-09:30	Nasal Fillers After Rhinoplasty: Solving The Problem or Creating A New One?	Ali Resuli
9:30-09:45	Setting The New Dome Adjusting The Projection in Rhinoplasty	İsmail Salcan
9:45-10:00	Otitis Media with Effusion	Suela Sallavaci
10:00-10:30	Coffee Break	
10:30-12:30	Session 2 Moderator: Halis Ünlü	
0:30-10:50	What has Changed in Rhinoplasty?	Halis Ünlü
10:50-11:10	Preservation Rhinoplasty: My Way	Seçkin Ulusoy
11:10-11:30	Preservation Rhinoplasty in My Practice	Sally Ali
11:30-11:50	Limitations of Preservation Rhinoplasty	Halis Ünlü
11:50-12:10	How I do it in Rhinoplasty	Bülent Karcı
12:10-12:30	Special Sutures for Special Procedures	Cemal Cingi
12:30-13:30	Lunch	
13:30-16:30	Workshop Esthetic Neurotoxin and Facial Volumizer Applications on Face	Cemal Cingi, Orhan Alan, Serpil Alan, Seçkin Ulusoy
16:30-17:00	Coffee Break	Serpii Alaii, Seçkiii Olusoy
17:00-18:30	Free Papers 2 Moderator: Ahmet Köder	
17:00-17:07	Pediatric ENT Emergencies Mustafa Colak	
17:07-17:14	Facial Paralysis in Children Abdulaziz Yalınkılıç	
17:14-17:21	Omalizumab Treatment in Allergic Rhinitis Nuray Bayar Muluk	
17:21-17:28	Obstruction After Septoplasty with Open Nasal Airway Asghar Memarzadeh	
17:28-17:35	Surgical Interventions for Chronic Sinusitis with Nasal Polyps Nurullah Ture, Cemal Cingi	
17:35-17:42	Allergic Rhinitis: Classification and Overview Nuray Bayar Muluk, Cemal Cingi	
17:42-17:49	Nasal Congestion: Diagnostic Approach Nuray Bayar Muluk, Cemal Cingi	
17:49-17:56	Evaluation of Nasal Mucociliary Transport Time with Saccharin Test in Patients with Nasa Celal Gunay, Bülent Demir	ll Septal Deviation
17:56-18:03	Clinical Evaluation of Our Nasal Septal Hematoma/Abscess Patients <u>Mehmet Zeki Erdem</u>	
18:03-18:10	Neutrophil Lymphocyte and Platelet Lymphocyte Ratios in Patients Operated for Cholesteatoma Doğukan Özdemir, Ayşe Çeçen, Merve Mutlu	
18:10-18:17	Cervical Fistulized Mass: Tuberculosis Dursun Mehmet Mehel, Doğukan Özdemir, Gökhan Akgül, Nesrettin Fatih Turgut, Merve Mu	tlu, Furkan Balaban
	A Rare Cause Of Headache: Mucopyocele with Uncinate Process	
18:17-18:24	Nurullah Türe, Muhammet Fatih Topuz	
8:17-18:24 8:24-18:30		

	27 th May 2022 • FRIDAY	
08:00-08:40	Free Papers 3 Moderator: Demet Yazıcı	
08:00-08:07	Nasal Respiratory Effects of Orthodontic Treatment Kemal Devrim İşçi, Enes Güngör	
08:07-08:14	Bibliometric Analysis of "Septoplasty" Search on Web of Science: Top 100 Cited Articles Tuğba Aslan Dündar	
08:14-08:21	Investigation of the Histological and Functional Effects of Calsium Phosphate Bioceramic Used in Nasal Septal Surgery in A Rabbit Model Hasan Kazaz, Yusuf Özgür Biçer, Sinan Seyhan, Aysel Kükner	
08:21-08:28	Evaluation of Endothelial Dysfunction Biomarkers in Patients with Allergic Rhinitis Durkadin Demir Eksi, Huseyin Gunizi, Ramazan Gunesacar	
08:28-08:34	Could Dimethyl Sulfoxide, A Super Solvent, Be A New Drug in Allergic Rhinitis? <u>Yücel Kurt</u>	
08:34-08:40	Analysis of Patients with Nasal Foreign Bodies Ayhan Kars, Fatma Atalay, Kübra Topal	
08:45-10:00	Session 3 Moderator: Ediz Yorgancılar	
08:45-09:00	Endoscopic Tympanolasty	Doğukan Özdemir
09:00-09:15	Steps of Cochlear İmplant surgery	Mehmet Akdağ
09:15-09:30	Sudden Deafness	Nazım Bozan
09:30-09:45	Vestibular Rehabilitation Maneuvers In Patients with Benign Paroxysmal Positional Vertigo	Demet Yazıcı
09:45-10:00	Important Landmarks for Safe Dacryocystorhinostomy	Mümtaz Taner Torun
10:00-10:30	Coffee Break	
10:30-12:30	Session 4 Moderators: İbrahim Çukurova- Cemal Cingi	
10:30-10:50	Inverted Papilloma Surgery: My Tecnique	İbrahim Çukurova
10:50-11:10	Current Treatment of Epiphora	İbrahim Çukurova
11:10-11:30	Endoscopic Evaluation of the Eustachian Tube	Jeffrey Bedrosian
11:30-11:50	Nasal Lavage: Why? When? How?	Jeffrey Bedrosian
11:50-12:10	Challenges in Endoscopic Surgery of Mucormycosis	Raluca Grigore
12:10-12:30	How I do it in Endoscopic Benign Tumor Surgery	Bülent Karcı
12:30-13:30	Lunch	
13:30-15:30	Live Surgery Broadcast Moderators: Cemal Cingi, Halis Ünlü, Bülent Karcı	Surgeon: Muhammet Dilber
15:30-16:00	Deviated nose	Regan Thomas
16:00-16:30	Tip refinement in rhinoplasty	Andrew Winkler
16:30-17:00	Topical Irrigations for Chronic Rhinosinusitis	Victoria S. Lee
17:00-17:30	Current treatment strategy in sinonasal squamous cell carcinomas	Ehab Hanna

ORAL PRESENTATION 2-2 Complications of Filling Materials Used in Revision Rhinoplasty and a Case Report

Ali Seyed Resuli MD

Istanbul Yeni Yüzyıl University Faculty of Medicine, Department of ENT, İstanbul, Turkey

There may be minor collapses in the nose of some of the patients had undergone rhinoplasty operation. Filling application is a good alternative for patients who are afraid of revision rhinoplasty surgery. The expected duration of action of the procedure exceeds one year. In these cases, minor revisions can be made by using filling materials and simple cosmetic problems are eliminated. Preparations that contain cross-linked hyaluronic acid (HA) are the mainly used filling materials. Since HA fillers have a hydrophilic structure, they tend to absorb water. This absorption can increase tissue volume over time.

Even though HA filling is a useful technique in revision rhinoplasty that is easily applied and gives rapid results, it may cause very serious complications starting from simple tissue reactions (Figure 1) to vision loss. Since, the filling is based on deep injections made into non visible areas, detailed knowledge of nasal anatomy is required for revision rhinoplasty with filling. It is essential to obtain detailed information about nasal arterial circulation before the filling is injected into the nose. The internal carotid artery system supplies the upper outer part of the nose via the dorsal nasal artery, which is associated with the ophthalmic artery, thus intra-arterial injection made into this artery may cause blindness. The external carotid artery system supplies the lower part of the nose via the lateral nasal arteries and the columellar artery. Intra-arterial injections made into these arteries cause more skin necrosis. It is known that the main arteries of the dorsum of the nose are located at the level of superficial or deep fat layers. Filling injection made into the deep supra-periosteal layer minimizes the risk of intra-arterial injection. It is known that the dorsal nasal artery is usually more lateral than the central position, thus injections should be made in the midline. The main measures that can be taken to minimize vascular complications are the use of small syringes, slow, gentle and small injections. Care should be taken when injecting fillers into a previously traumatized area, especially a nose that has undergone previous rhinoplasty surgery. Vascular complications may develop in approximately 1% of patients. Most of these complications are skin necrosis. Early symptoms of intra-arterial injection are sudden severe pain and whitening of the skin. In this case, the injection should be stopped immediately and hyaluronidase and other treatments should be started. As a result, although HA filling application is a practical method, it should be performed very carefully.

Keywords: Revision rhinoplasty, filling material, hyaluronic acid, complication
